DEC Metals and Minerals Analyses 2008 Emlab Data.PDF
DEC Fingerprinting Analyses 9524 and 9540 NF Blvd and Cemetery.PDF

Hi Margo,

Please see the email below for the results of a February 2017 radon test at Mr. Raymond's house, 5374 Robert St.

As promised, I am also forwarding documents (they are somewhat duplicative) from the DEC's prior fingerprinting work. Please see the attached pdfs.

I will call you shortly to discuss some follow-up questions.

Thank you,

Tom

02/09/17 ACTIVATED CHARCOAL RADON TEST #6369668

* Radon Test Result = 71.4 pCi/L

* Test Started 02/01/17 at 7:00 pm

* Test Ended 02/05/17 at 7:00 pm

* Location Basement

JOHN RAYMOND
5374 ROBERT ST
LEWISTON, NY 14092-2124

** INTERPRETING YOUR TEST RESULT

The US EPA action level for indoor radon is 4.0 pCi/L. The EPA recommendation for test results in this range (8 to 100 pCi/L) is to conduct a short-term follow-up measurement within the next few weeks. A long-term measurement is NOT recommended because additional exposure at these levels could pose an increased health risk. If, however this is a follow-up (confirming) test, it is recommended that you take remedial action to reduce these radon levels.

You may be able to obtain additional information about radon related subjects by calling your state radon officer at 800-458-1158.

Or call the "Radon Fix-It Line" at 800-644-6999 Monday thru Friday between NOON and 8 pm EST.
